MANUFACTURER OF COMPOSITE MATERIALS

# Discover WoodPlastic® DECKING

Do you dream of beautiful, luxurious decking with the grace and nobility of wood, but dread the hours of annual maintenance? Do you want to just relax on your decking with your family and friends?

Now you can with our revolutionary material WoodPlastic®, which combines wood (40 %) and a high-quality, non-toxic HDPE polymer (40 %) at just the right ratio, making it one of the strongest and most durable low maintenance materials for your decking. The ideal properties for exterior use were achieved thanks to the revolutionary process and laser technology of Strandex (USA), which is one of the most advanced WPC technologies owing to many years of development and testing.

You can trust WoodPlastic® products. That's why we provide a warranty lasting up to 25 years. Laboratory tests estimate the durability of WoodPlastic® decking to have a very long service life.

Thanks to its sophisticated composition, our decking is highly resistant against the weathering effects of rain, sun, and frost, in addition to chlorinated and salt water, wood-decaying fungi, rot and insects. It resists mechanical damage like hardwood.

The WoodPlastic® decking, unlike wooden ones, requires no waxing, oil-coating, or any other kind of surface treatment. Maintenance is easy: simply rinse with flowing water – more time left for fun!

WoodPlastic® decking is made in original patterns in a very wide selection of colors. It looks and feels like wood. In addition, it contains no toxic substances and is 100 % recyclable.

WoodPlastic® decking has an anti-slip surface, and unlike wood, never leaves splinters. That makes it completely safe, convenient for walking barefoot, and a perfect fit for your swimming pool or hot tub.

WoodPlastic® products are made in the Czech Republic with US-licensed Strandex technology, which is among the most advanced in the world thanks to many years of development.
